Mobile App Development - Assignment 2: Quiz Builder

Ryan Osborne - w0201814 - 18 November, 2021

Storyboard & Wireframe:

Component names are named in corresponding wireframe file (e.g. component names for MainActivity are found in A2_Wireframe_1_Main).

In each wireframe picture, component names and types are listed on the right and are ordered from left to right, top to bottom. Panels, Arrows and Sticky Notes are used in Wireframe software but are not used in app.

All names used in these wireframes are the exact names used in the Android app.

Also included is the colour palette for this app. Colour #92AFD7 was used for the background throughout the app, while #395B50 was used for buttons and for a bar on the Quiz activity. #C5D1EB was used to create a panel-like area on the Results activity.
